

Notice of Tree Thinning & Felling January - February 2012

Sheffield &
Rotherham

Orange areas: conifers to be clearfelled and replanted with native broadleaves.

Yellow areas: conifers to be clear-felled then restocked. Conifers to be replanted in this area to retain an income stream.

Dark green areas: mixed woodland area where conifers to be thinned out and broadleaves retained.

Light green areas: native broadleaf to be thinned (by 5%) to allow more light to the woodland floor.

Timber to be extracted via Sandy Lane, avoiding most heavily used footpaths and tracks where possible.

Footpaths and tracks will be fully reinstated following extraction.

Through sustainable management, we will improve biodiversity, manage forestry operations sustainably, and develop the site for recreation and education.
